PROFILE SUMMARY

As an Informatics Engineering student at Multimedia Nusantara University, I am deeply passionate about programming and software development. My strong grasp of software design principles and complex problem-solving drives me to continuously explore and build innovative, effective, and scalable applications.

EDUCATION

Universitas Multimedia Nusantara — *Tangerang Selatan, Indonesia*

Bachelor of Informatics Engineering | *GPA: 2.99/4.00* — Aug. 2024 – Aug. 2028 (Expected)

EXPERIENCE

UI/UX Designer (Laughtown Coffee)

Jun. 2026– Aug 2026

- As the UI/UX Designer, I built the end-to-end interactive Figma prototype for Laughtown Cafe's POS and Management Dashboard, designing a high-speed cashier interface and real-time management system that cut checkout times from 35 to under 12 seconds.

Film Crew (Lobak Studio)

Oct. 2025 – May. 2026

- Production drivers and extras play essential roles on set, with drivers managing logistics by safely transporting cast, crew, and heavy equipment according to tight schedules, while extras act as background to create a realistic environment without distracting from the lead actors.

Poster Design and Packaging Design (Chuan Qi Claypot)

Oct. 2025 – Dec. 2025

- Worked as a project based designer for Chuan Qi, creating promotional posters and product packaging to enhance their visual branding and drive customer engagement.

PROJECTS

Plant Leaf Disease Detection — 2026

- This Project develops an AI-driven smart agriculture system that detects plant leaf diseases efficiently using the lightweight EfficientNet-B0 deep learning model. To ensure transparency, it integrates Explainable AI (Grad-CAM) to generate visual heatmaps showing the exact leaf areas triggering the diagnosis, while automatically offering actionable treatment recommendations to help farmers manage crop health.

Health Hub Serpong (Figma) — 2026

- This study designs Health Hub, an integrated digital healthcare application that applies Human-Computer Interaction (HCI) principles and intuitive UI/UX design to enhance accessibility for the general public. The platform enables users to effortlessly access doctor schedules, nearby medical facilities, real-time medicine availability, and emergency ambulance dispatch through a seamless, all-in-one interface.

Money, Bank, Gas (Game Dev) — 2026

- Money Bank Gas is a 3D financial management game focused on cash flow mechanics and ATM deposit operations. The game challenges players to efficiently process transactions, manage money streams, and optimize financial stability through interactive 3D gameplay.

Technical Reconstruction of a LockBit 3.0 Ransomware — 2026

- Conducted a technical reconstruction of the May 2023 LockBit 3.0 ransomware attack on a major Indonesian bank, mapping its kill chain across MITRE ATT&CK vectors, hybrid cryptography, and network exfiltration methods. To study ransomware dynamics, I executed an air-gapped simulation using Hidden Tear to analyze Shannon Entropy shifts during file encryption. Based on these findings, I conceptualized a behavior-driven detection architecture using Random Forest classification alongside NIST SP 800-207 Zero Trust frameworks to mitigate double-extortion threats.

ORGANIZATIONS

Coordinator of Insurer | Mentoring UMN 2026

- Led and coordinated a 30-member team to ensure safety protocols, risk management, and operational security throughout the onboarding event.
- Managed emergency response procedures and handled critical incidents during event execution.

Coordinator of Documentation | Fortius Esports 2025

- Directed a 5-member documentation team to establish visual coverage strategies and media capture for esports tournaments.
- Supervised the production of high-quality event photos and promotional media assets for key tournament moments.

Documentation Staff | UMN ECO 2025

- Focused on videography, capturing dynamic footage and key highlights throughout the environmental initiative events.
- Collaborated with the media team to produce raw video assets for post-event recap videos and promotional campaigns.

Logistics & Equipment Staff | ISFEST 2025

- Managed equipment procurement, inventory tracking, and technical logistics to support smooth event operations.
- Coordinated cross-divisional setup and breakdown of physical assets and venue infrastructure.

Coordinator of Documentation | Fortitude Esports 2025

- Directed a 5-member documentation team to establish visual coverage strategies and media capture for esports tournaments.
- Supervised the production of high-quality event photos and promotional media assets for key tournament moments.

SKILLS

UI/UX Design & Prototyping, Responsive Web Design, Problem-Solving & Debugging, Photography, Videography, Video Editing, Team Collaboration

TOOLS

- Design & Multimedia: Adobe Photoshop, Adobe Premiere Pro, Figma
- Development: Python, C/C++, Java, Kotlin HTML/CSS, Git, VS Code
